Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 15 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim or amend the claim to place the claim in proper dependent form. Claim 15 simply repeats limitations that have already been incorporated into claim 1 (from which claim 15 depends) by the amendment of February 28, 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Murakami US 6,082,911.

Murakami discloses a method for printing a test pattern including a predetermined pattern element (figure 1) on a print paper in an ink jet recording method with a head (abstract), the method comprising the steps of:

dividing the pattern element into a plurality of portions (as indicated at least by figures 1-5 each of the pattern elements making up the test page are divided into an upper portion 43 and a lower portion 44); and

causing each of different portions of the head to print a plurality of dots sequentially in a plurality of passes, said plurality of dots constituting a portion of the pattern element (as indicated at least by figures 6 and 7 during the left to right pass 48 portions of the head print a first pattern and during the right to left pass 49 different portions of the head print a complementary pattern).

Response to Arguments

3. The applicant's arguments of February have been considered and are persuasive as to the allowability of claim 1 and 11 as amended. New claim 19 is seen as allowable for reasons similar to that of the amended claims. However new claim 18 is clearly anticipated by Murakami '911 as noted above.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2853

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
